

RAYONEX®-VITAL SUBSTANCES

TREATMENT CURE

Holistic food supplements and cosmetics that complement each other

Each of our food supplements has its own individual significance. They also complement each other optimally. Therefore we offer them individually as well as in a treatment package, the Rayonex®-vital substances treatment cure.

Contents of the Rayonex® vital substances treatment cure
Rayobase® (217 g powder, 62 sachets of 3.5 g)
Rayosole® plus (400 g salt, 4 small boxes of 100 g)
Rayoflora® (62 g powder, 31 sachets of 2 g)
Rayovita® (62 g powder, 31 sachets of 2 g)

This ensures an optimal adoption to your organism, to what your organism needs.- individual, need-orientated!

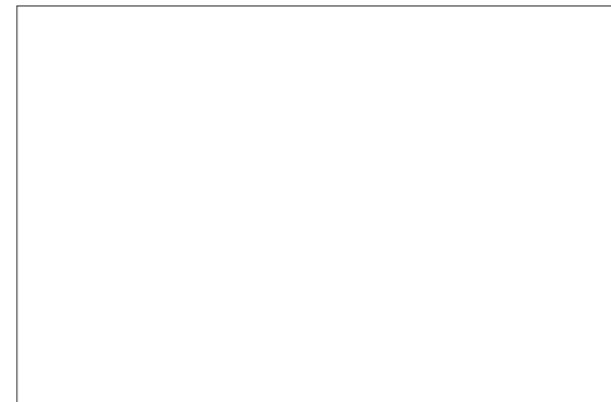

Important information:

Irrespective of the breadth of information, advice and problem-solving approaches provided hereby and resulting from over 35 years of experience, it cannot replace the visit to a practitioner of alternative medicine or a physician with an interest in naturopathy. Further, please note that traditional orthodox medicine does not accept or even recognise the effects of bioenergetic oscillations.

The inner balance

The acid-base balance and the gut microbiota are in our opinion the pillars of our health. The pre-requisites for maintaining one's health (prevention) as well as for a fast recovery are a balanced acid-base balance and a well functioning gut microbiota. The crucial efficacy factor for the maintenance of the acid-base balance is an optimal supply of essential mineral substances, trace elements and vitamins as well as an effective excretion of metabolic products. Crucial for a stable gut microbiota is the right balance between the number of different bacteria cultures.

Special features

Our holistic food supplements and cosmetics were developed based on the Bioresonance according to Paul Schmidt. After selecting the raw materials, based on pure biochemical findings every single raw material was tested with Bioresonance according to Paul Schmidt. This way the influence of a substance on the physiological oscillation pattern of the body was examined.

Developed with the Bioresonance according to Paul Schmidt:

- **Rayobase® and Rayovita®** – holistic food supplements for balance in the acid-base processes. Rayobase® and Rayovita® contain the trace element zinc. Zinc contributes to a normal acid-base metabolism.
- **Rayoflora®** – holistic food supplement with a balanced combination from microorganism cultures.
- **Rayosole® plus** – holistic basic bath additive for supporting the excretion of natural metabolic products through the skin.

MINERAL SUBSTANCES

TRACE ELEMENTS AND VITAMINS

MICROORGANISM CULTURES

ALKALINE BATHS

RAYOBASE®

Rayobase® is an alkaline mineral preparation.

Apart from the minerals potassium, calcium and magnesium Rayobase® contains the trace element zinc and silica.

Zinc contributes to a normal acid-base metabolism. Furthermore it protects cells against oxidative stress and it strengthens the immune system. Magnesium, calcium and potassium contribute to a normal muscle function. Magnesium and potassium support the nervous system. Calcium and magnesium ensure a normal energy metabolism and maintain bones and teeth. Calcium supports the digestive enzymes.

Rayobase® is available in powder form and in capsules. The recipes are identical. The capsules are enteric coated and vegan.

Rayobase® is free of animal protein, gluten, milk, lactose, fructose and yeast. Rayobase® is suitable for vegetarians and vegans. Magnesium contents over 250 mg may produce laxative effects in susceptible individuals.

RAYOVITA®

Rayovita® contains a balanced combination of trace elements and vitamins.

With zinc Rayovita® contains a trace element that is essential for the regulation of the acid-base balance. Iron, manganese, biotin, niacin, pantothenic acid, vitamin B1, B2, B6 and B12 and vitamin C contribute to a normal energy metabolism. Biotin, niacin, vitamin B1, B6 and B12 and vitamin C support the nervous system. Biotin, folic acid, niacin, vitamin B1, B6 and B12 and vitamin C support the psyche. With iron, folic acid, selenium, vitamin A, B6, B12, C and zinc Rayovita® supports the immune system. With manganese, vitamin B2, selenium, vitamin C, vitamin E and zinc Rayovita® protects the cells against oxidative stress. Furthermore it contains the secondary plant substances OPC from grape seed extract. Iron, folic acid, niacin, vitamin B2, B6, B12 and vitamin C reduce fatigue and weariness. Biotin, niacin, vitamin B2 and vitamin A maintain the mucous membrane.

Rayovita® is free of animal protein, gluten, milk, lactose, fructose and yeast. Rayovita® is suitable for vegetarians and vegans.

RAYOFLORA®

Trillions of microorganisms populate our intestines. Bacteria live with us, people, in symbiosis - a community between men and bacteria with mutual benefits.

Intestinal bacteria are crucial for our health. They fulfil important tasks for our metabolism and our immune system, of which 80 % is located in the intestinal mucous membrane.

Rayoflora® contains a balanced combination of microorganisms.

Bacteria concentration:
at least 1×10^9 /g (2×10^9 per sachet)

Rayoflora® is free of animal protein, gluten, milk, lactose, fructose and yeast. Rayoflora® is suitable for vegetarians.

RAYOSOLE® plus

Partner of Rayobase®

The central acid excretion organs are the kidneys. However, the kidneys cannot arbitrary excrete acids. When the acid level is too high the kidneys are put under stress. To relieve the kidneys there are alkaline baths.

Rayosole® plus is a basic mineral bath salt suitable for alkaline full baths and foot baths, alkaline wraps and socks. Rayosole® plus may also support the natural excretion of acids through the skin.

Info: Tests with Bioresonance according to Paul Schmidt revealed that it makes sense not to combine trace elements and vitamins directly with mineral substances. Therefore we offer these in two separate products: Rayovita® und Rayobase®.
